

HAVE YOU HAD A TBI (CONCUSSION)?

Volunteers Needed to Test a New Treatment

Since your TBI or concussion, have you had:

- Pain?
- Dizziness?
- Loss of Balance?
- Problems with Hearing or Vision?

Please join our study, in which you may receive a computer-guided treatment that translates your brain frequencies into sounds, as a way to improve your symptoms.

Participation involves 10 treatment sessions, over 1 to 5 weeks.

Protocol Title: Randomized controlled trials of closed-loop allostatic neuro-technology to improve sensory function and pain management after traumatic brain injury.

Principal Investigator: Michael J. Roy, MD, MPH, Colonel (Retired), U.S. Army

- You may be compensated for your participation
- For more information, please contact Dr. Michael Roy at **301.295.9601** or michael.roy@usuhs.edu
- This study is sponsored by the Congressionally Directed Medical Research Programs through the U.S. Army Medical Research and Materiel Command (USAMRMC)
