WE NEED YOUR HELP!

Volunteers Needed
Help Us Learn More about the Effects of Blast Exposure

The Department of Audiology and Speech-Language Pathology is currently looking for volunteers for a research study exploring the effects of blast exposure on current and former US Service Members. Participants of the study will complete a series of hearing, cognitive, and electrophysiological tests in up to 5, two-hour sessions. Compensation and a completion bonus will be provided (if eligible).

ELIGIBILITY
Blast-exposed
Between 18-55 years of age
Normal hearing (H1 profile)
Deployment during military service
DEERS-Eligible
