IRB NUMBER: WRNMMC-2018-0201

IRB APPROVAL DATE: 01/11/2019

IRB EXPIRATION DATE: 01/10/2020

Subjects requested to test a research intervention in a virtual reality environment for participants with PTSD

Are you an active or retired military service member?
 Have you had a concussion or traumatic brain injury (TBI)?
 Are you more angry, irritable, or anxious?
 Are you on edge, having nightmares or trouble sleeping?
 Do you avoid going places or getting together with others?

Please contact us to join our study assessing the impact of a new research intervention for posttraumatic stress.

10 sessions, each lasting 90 minutes, over 10 weeks

Follow up at 3 and 6 months

Located at the National Intrepid Center of Excellence (NICoE)

Protocol Title: Clinical Trial of 3MDR to Treat PTSD with Mild TBI, With and Without Eye Movement ■ Principal Investigator: Michael J. Roy, MD, MPH, ■ 4301 Jones Bridge Rd., Bethesda, MD 20814 ■ For more info, contact Dr. Michael Roy at 301.295.9601 or michael.roy@usuhs.edu
